This document was prepared by Mills Jewelers, 51 Main St, Lockport, NY 14094, for the purpose of determining identification and value in the event of a claim for insurance replacement. It is not be used for any other purpose. Mills Jewelers does not offer or endorse any insurance company. Insurance may be purchased separately through homeowners or renters policies. This report was prepared by members of our trained staff using industry accepted gemological techniques.

NOTE: The stones listed in this report were evaluated while still in the settings. Mounted gemstones have been graded, identified and listed insofar as mountings allow for accurate determinations. It is assumed that there are no chips or inclusions under the prongs. All grades, weights, and measurements of stones should be considered approximate. More precise weights, dimensions, clarity and color grades can only be achieved by removing the stones from the setting.

The values set forth herein are estimates of the average current market price at which the documented jewelry may be purchased in the average fine jewelry store. Jewelry valuation is partially subjective. Therefore, estimates of replacement value may vary from one expert to another. Such a variance does not necessarily constitute an error. Also the consumer should be advised that resale or estate value is calculated at a lower rate based on a different set of re-selling circumstances to a willing buyer.

This document should not be used as the basis for purchase or sale of items listed within and is provided solely as an estimate of the approximate replacement values of the listed items at this time.

Mills Jewelers disclaims all responsibility and liability resulting from any suit of law which might arise in connection with this document. In no event will Mills Jewelers or it's agents be liable for any damages arising from customers use of or reliance on this document, or any other.
